SUMMARY

Junior Web Developer and Mid-level Graphic Designer, demonstrated strong communication and collaboration skills and interested in problem solving and project management. Experience with strategic working and major marketing campaign development for large academic institutions and recreation industry retail companies. Collaborative projects include brand-identity development and re-branding projects for small to medium businesses and helping clients to develop social media and online strategies. Interested in finding opportunities to use my creative and coding skills to help improve audience engagement and user-experience.

TECHNICAL SKILLS

React.js, Node.js, Express, MongoDB, MySQL, Git, HTML5, CSS, Bootstrap, Adobe CC, Photoshop, Illustrator, InDesign, Premiere Pro, WordPress, PHP, cPanel, phpMyAdmin, Google Analytics & Ads, FB Business Manager

PROJECTS

Needs & Deeds | GitHub: <https://github.com/kellymedia/needs-and-deeds> | Demo: bit.ly/needs-and-deeds

- App uses device location to create a marker on the community map, and includes a unique message. Share your name and your message to show other people your favorite sunset or fishing spot etc.
- Contributions: Research, Concept, UI/UX design, conversion from Bootstrap to MaterializeCSS, slide deck
- Tech: React.js, Express, MongoDB, Node.js, MaterializeCSS

Find & Dine | GitHub: <https://github.com/kellymedia/find-and-dine> | Demo: bit.ly/find-and-dine

- App provides recipe ideas and nutrition information based on user input of available ingredients. User enters what they want to cook with and Edamam API provides recipe links and picture of potential meal ideas.
- Contributions: Lead, Concept, UI/UX design, slide deck presentation
- Tech: MaterializeCSS, Javascript, jQuery, Edamam API, HTML5, CSS
